

Department Shredder

50564 Matrix High Performance Shredder

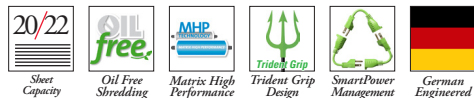

Wondering when your shredder was last oiled is no longer a concern with Dahle's oil-free, hassle-free shredders. Through clever engineering, these machines maintain peak performance without the aid of oil, and reduce the chance of a paper jam. Dahle Oil-Free Shredders are not only convenient to use and economical to maintain, but also easier on the environment.

Oil free shredding is made possible by the hybrid Matrix High Performance (MHP) cutting cylinders. Aggressive cutting edges are fused to a solid steel shaft, creating an incredibly strong bond and providing superior shredding capabilities. The cylinders Trident Grip design produces three continuous points of contact with the paper, pulling it straight through the cylinders. This smooth, even pull prevents the paper from becoming wedged to either side, and provides unprecedented jam protection.

Dahle's 50564 can easily shred both letter and legal size paper with ease. It offers automatic on/off, continuous run and numerous safety features for the ultimate in convenience and performance. All you need to decide is what document to shred and this Dahle Department shredder will take care of the rest.

The 50564 is equipped with the revolutionary SmartPower Energy Management. This multi-stage system reduces power after ten minutes of sitting idle (sleep mode), and completely powers down after an additional 20 minutes of inactivity. Dahle SmartPower will appeal to those interested in conserving energy as well as reducing electrical costs.

This Matrix High Performance shredder is German Engineered with precision from over 85 years of experience. The end result is a quality machine and peace of mind in knowing the cutting cylinders are guaranteed for life.

Features

- Sheet Capacity: 20 / 22
- Oil Free / Maintenance Free
- Trident Grip Jam Protection
- SmartPower Energy Management
- MHP Cylinders Guaranteed For Life
- German Engineered

Aggressive cutting edges are fused to a steel shaft, creating an incredible bond and superior performance.

The easy-to-use command dial controls all shredder functions including power up, reverse, and continuous run.

Specifications

Model	Feed Width	Capacity #20 / #16	Security Level	Shred Size	Waste Volume	Speed feet/min	Decibel Level	Special Features					Warranty		Dimensions	Weight
