

# DAHLE GUILLOTINES

## PREMIUM SERIES - LARGE FORMAT

### L.F. GUILLOTINES PREMIUM SERIES

- ▶ Commercial grade guillotine equipped to handle large format work
- ▶ Ground self sharpening blade made of Solingen steel is lockable to prevent injury
- ▶ Cuts up to 30 sheets of paper at a time
- ▶ German engineered for precision and accuracy
- ▶ Manual clamping system holds work securely in place and prevents fanning
- ▶ Acrylic safety shield prevents hands from being in the wrong place
- ▶ Includes metal stand to maximize space
- ▶ Optional laser ensures accuracy by illuminating cut line across the entire surface

Not all projects can be cut on standard size trimmers. For these large format applications, Dahle's created a Premium Series of large format guillotines. These commercial grade cutters are designed to cut large amounts of paper with your safety in mind. This series has built in features that will make your cutting task a safe and pleasurable experience.

Dahle's Premium Series large format guillotines offer an acrylic fan guard to prevent injury by keeping hands from being in the wrong place. The ground, self sharpening cutting blade is made of German Solingen steel and maintains a perfectly honed edge every time it is used. This blade can also be locked to prevent unsupervised use by others. The manual foot clamp holds material se-

curely across the entire cutting surface. A spindle driven backstop on the "cut off" table and optional laser guide ensures that each cut is as accurate as possible. This guillotine sits on top of a permanently mounted stand to ensure proper height and leverage for trimming.

Dahle's Premium Series large format guillotines are German engineered and available in 32" and 43" cutting lengths. They can be found in art departments, custom frame shops, and print & copy centers throughout the world.

Extendable "cut off" table offers convenience and versatility when trimming larger items.

Optional laser guide ensures accuracy by illuminating the cut line across the entire cutting surface.
